If you've never heard of the term "ringtone," you're definitely not alone. Have you ever wondered what a "ringtone" is? For most people, the first thing that comes to mind is probably a phone call. It's been a standard part of mobile communication for decades. But what is a ringtone? A ringtone is a short sound you hear on your phone in place of a phone call. The mobile phone did not have a dial function until the 1980s, so mobile phones (also called "cell phones") needed a different way to reach people. The most common method of communication at that time was through voice, so the phone automatically dials the last number dialled by the person you were talking to, called the "last number redial". At that time, mobile phones were very expensive and only used by businesses, so users were unlikely to have several contacts dialed at once. At that time, mobile phones were very expensive and only used by businesses, so users were unlikely to have several contacts dialed at once. Instead of being able
